

Kamel Ahmed Mohamed Mandoh Ramadan

Frontend Developer & Computer Science Student

+20 155 934 6984 | kamelmando498@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Junior Computer Science student and Frontend Developer specializing in building modern, responsive, and high-performance user interfaces with React, Next.js, and Tailwind CSS. Proven ability to translate UI/UX design into clean, production-ready code, demonstrated through a live, fully deployed client website. Complements frontend expertise with a growing analytical skill set in Python and data analysis, enabling a data-informed approach to building user-centric digital products.

EDUCATION & ONGOING INITIATIVES

Bachelor's Degree in Computer Science Expected Graduation: 2027
Misr Higher Institute For Commerce & Computers | 3rd Year (Junior Student)

Current Initiatives & Training

- National Telecommunication Institute (NTI)** — Summer Training in Web Development & Data Analysis.
- Digital Egypt Pioneers Initiative (DEPI)** — Junior Data Analyst Track (Currently Enrolled).

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS
Tools & Deployment: Git, GitHub, Netlify, Developer Environment Optimization (HP ZBook Workstation Workflows)
Data Analysis & Core Programming: Python, Pandas, NumPy, Microsoft Excel (Power Query, Pivot Tables)

PROFESSIONAL SKILLS

Problem-Solving & Logical Thinking : Solving complex coding challenges with sharp logical thinking
Team Collaboration & Communication : Communicating effectively and working seamlessly within a development team.
Time Management & Adaptability: Balancing university studies and summer internships efficiently.
Digital Video Editing & Visual Storytelling: Applying creative storytelling using modern video editing tools.

FEATURED PROJECTS

Ahmed Mandoh Law Office — Portfolio & Business Website

Live Site: [ahmed-mandoh.vercel.app](#)

- Engineered a fully responsive, production-grade business website for a professional law firm, elevating the client's digital presence and credibility with prospective clients.
- Architected the UI/UX with a focus on intuitive navigation, visual hierarchy, and accessibility, resulting in a polished, professional user experience across devices.
- Optimized frontend performance through asset compression and efficient code structuring, achieving fast load times and smooth rendering on both desktop and mobile.
- Built with modern frontend technologies (HTML5, CSS3, JavaScript) and deployed via Netlify, implementing a streamlined CI/CD-style deployment workflow from local development to live production.
